1. Daniel Tanoos helped write the radix sort, found where to logically insert the `num_cmps` variable that counts the number of comparisons, and helped debug why we had incorrect comparison values for very long input lists. He worked on parts 3, 4, and 7 of the report.

2. Debugged radix sort, assisted in counting number of comparisons, obtained experimental results, wrote parts 1 & 2 for the report, combined report parts to one file.

3. Coded the input generator (`ingen`), Graphs, Report problems 5b and 6, More Graphs
